Embracing Autism

Support, Education and Possibilities

WHO WE ARE

Embracing Autism was founded in 2011 to help families in Central Ohio support children and adults with autism. We believe that training specific to autism is essential in creating a solid and long-lasting foundation for individuals with this developmental disability. Embracing Autism caregivers are professionally certified through a PATHS (Professional Advancement through Training & Education in Human Services) multi-level program so each employee is educated in providing top-quality support.

OUR MISSION

- To provide customized care for every individual and family we serve using communication as the foundation
- To establish and foster community partnerships that promote innovative, involved support
- To train and empower our employees so that they are successful in providing quality services

OUR SERVICES

Embracing Autism serves Franklin, Delaware and Union counties in Central Ohio and offers the following:

- Individual Options Waiver
- Level One Waiver
- SELF Waiver (beginning July 2012)
- Private pay

In addition to the professional support services we offer, Embracing Autism has partnered with parents and teachers to create a training curriculum catered to those who work with autistic children. We believe this curriculum will benefit educators, medical professionals and community caregivers on how to better work together to meet the needs of children with autism.
