Sensory Solutions LLC is dedicated to providing the most personalized integrative and skilled Occupational Therapy, Speech Therapy, Physical Therapy and Neurofeedback services available. We pride ourselves in having only the most trained and experienced therapists on staff. With only eight therapists on staff we have over 75 years experience combined! We strive to provide programs that will meet the family and child's needs. At Sensory Solutions, we identify a child's current development, investigate underlying causes for development and behavioral challenges and provide ongoing support facilitating independence and positive changes. Our therapists are dedicated to the services provided, offering professional and exceptional service to effectively address both the parents' concerns and the children's needs. We closely follow new therapy intervention developments and implement them into our setting when most appropriate.

Our staff is dedicated to each family and child we meet, assisting each child in realizing their innate potential.

We accept Delaware County Board of DD funding for all of our services.

**Please call or email us to set up an appointment!
We look forward to working with your family!**
