Dear Families,

Hello! I am a Speech-Language Pathologist who loves working with children. Practicing since 2000 has given me a great deal of experience that I hope to share with you. I specialize in doing evaluations (testing) and therapy with children age 15/18 months through young elementary age who:

- have a general language delay (are not talking as much as they should be)
- have difficulty understanding what is being said to them or asked of them
- are not producing sounds and words clearly
- have play or social skills that need improved

I am also Hanen trained in "It Takes Two to Talk", a program that teaches parents easy ways they can improve their toddler's and preschooler's communication skills at home, in everyday situations. I look forward to sharing my knowledge of effective strategies with you and your child. Please feel free to contact me via email, phone or text.

Thank you for considering me,

Jen
