Hi!

My name is Debbie Seeds. I love children and specialize in the area of early intervention. I have been working with 0- 6 year old children for over 15 years. I have and continue to serve a very diversified population per diagnosis, disability/delay, and culture. I presently work for Franklin County Board of MRDD in early intervention providing home based speech therapy services. I am excited to be working in Delaware county now! My therapy approach will always depend on the unique needs of each and every special child and family. In addition, play based/child directed and family involvement are foundations to success at this age.

Please feel free to contact me with any question. I look forward to providing speech language therapy services to enable children to communicate to their maximal potentials!
