

# **Ohio-At-Home Health Care Agency Is About...**

Caring for children and adults who have developmental disabilities, and who depend upon others to fulfill their life potential. Our team of care professionals specializes in providing quality care as we create partnerships with the clients' families, as well as with their teachers, employers, medical teams, and all the other functioning components that give each client his/her place within the community. Insofar as possible, our goal is to give reliable, broad-based care for physical and emotional needs as we encourage them to be aware of their surroundings, the beauty of nature, and to understand their connection with the environment. We look to expand our clients' world by exploring and expressing their own gifts and talents.
